Professional Objective

Computer Science graduate with hands-on experience in full-stack web development, mobile app development, and cybersecurity. Skilled in JavaScript, React.js, Python, Django, C++, and SQL, with a track record of building REST APIs, database-driven dashboards, and production-deployed applications. Seeking a Developer Internship/Entry-Level role to contribute to real-world projects and grow as a software engineer.

Technical Skills

Languages: C++, Python, JavaScript, SQL, PHP
Frontend: React.js, HTML, CSS, Tailwind CSS, Responsive UI/UX
Backend & Mobile: Django, Django REST Framework, REST APIs, Flutter, Firebase
Databases: MySQL – Schema Design, Queries, Joins
Tools: Git/GitHub, VS Code, Nmap, Burp Suite, Nessus, Postman
Concepts: OOP, Component-Based Architecture, Role-Based Access Control

Professional Experience

VAPT Intern – NECOP, Islamabad

Jul 2025 – Aug 2025

Vulnerability Assessment & Penetration Testing

- Performed vulnerability assessments and web application/network security testing on client-facing systems using Burp Suite, Nmap, and Nessus.
- Identified, validated, and documented security findings in technical assessment reports for handover to senior professionals.

Projects

Factory Management System

GitHub

Django REST Framework, React.js, Tailwind CSS, MySQL

- Built a full-stack system for order processing, inventory management, and billing with a Django REST API backend and React.js frontend.
- Designed MySQL schemas for reliable, centralized data management
- Deployed to production (Railway & Vercel), resolving CORS/CSRF, static file, and API routing issues.

Chatbot-Based Vulnerability Scanner – Final Year Project

Django, React, Groq API, Nmap, Metasploit

- Built an AI-assisted vulnerability scanning platform enabling non-technical users to run security assessments via natural language.
- Integrated Nmap and Metasploit with an LLM (Groq API) behind a REST API layer to automate end-to-end scans and generate human-readable reports.

GeoVista – Web GIS Application

GitHub

JavaScript (ES Modules), Leaflet, Tailwind CSS, HTML/CSS

- Built a portfolio-grade Web GIS application with interactive maps, custom basemaps, layer management, and spatial data import.
- Implemented drawing, measurement, and attribute-editing tools using Leaflet and vanilla JavaScript modules for a lightweight, dependency-light frontend.

Safe Route – Mobile Application

Flutter, Firebase, MapBox API, Feed Forward Neural Network

- Developed a cross-platform mobile app in Flutter with Firebase backend to help users find safer travel routes.
- Integrated the Mapbox API and a Feed Forward Neural Network to score route safety on a 1–10 scale.

Key Achievements

- 92.2 percentile in the National Skills Test (NST).
- ICPC 2026 – Qualified for the Regional Round, competing against top university teams.
- SOFTEC 2026 – Qualified for the Final Round of the programming competition.
- Participant, NUMLOG 2025 and NASCON 2025 national programming competitions.

Education

Bahria University, Islamabad, Pakistan

2022 – 2026

Bachelor of Science in Computer Science – CGPA: 3.59
